WEATHER COMMENT: Sun Apr 21 17:21:29 GMT 2002

Thin cirrostratus overcast, wind=5 mph from the SSE, temp=46 F.

Sun Apr 21 17:38:36 GMT 2002 CHIP Start Patrol

MKIV COMMENT: Sun Apr 21 17:34:55 GMT 2002

Temperature near camera according to the thermal printer is about 37 C, that was the temperature when I closed down yesterday too, so the heater is regulating well. I just turn on the printer and read the display, not printing out anything. The printer sensor is about 0.75" away from the RTD used by the heater. The camera was turned off overnight for the first time in a long while, and I didn't put the external heating pad over the camera bay. I still need to put the insulation over the heater and RTD as requested.

****GONG PROBLEM****: Sun Apr 21 17:44:50 GMT 2002

The Sparc terminal still won't come up all the way to allow us to monitor the Instrument. The instrument is working well, but apparently the network connection to the shelter is down - maybe NOAA removed it?

****** EVENT COMMENT ******: Sun Apr 21 17:48:50 GMT 2002

Nice EPL on West limb.

MKIV COMMENT: Sun Apr 21 18:02:05 GMT 2002

Since the clouds are ruining the scans I'll pause and install the insulation.

PSPT COMMENT: Sun Apr 21 18:24:15 GMT 2002

Observing.

COMMENT: Sun Apr 21 18:45:08 GMT 2002

Extended the dome slot.

MKIV COMMENT: Sun Apr 21 18:45:20 GMT 2002

I finished insulating around the RTD and heater. Still seeing regulation around 37 C according to the printer readout, looks good.

WEATHER COMMENT: Sun Apr 21 20:24:10 GMT 2002

Still have a thin cirrostratus overcast, it has been there all day, but now it is thinning to the point that I can see mk4 data.

MKIV COMMENT: Sun Apr 21 20:25:10 GMT 2002

Finally the clouds have thinned enough to see some data. I've been letting it run even in the clouds in hopes of seeing something good. I did a cal earlier but I'll try to do another now that the data are better.

MKIV COMMENT: Sun Apr 21 22:51:50 GMT 2002

The printer sensor reads a regulated temperature around 38.3 C now due to the new heater on the camera mount.

Sun Apr 21 22:53:41 GMT 2002
