Observing.

WEATHER COMMENT: Sat Jun 8 17:11:41 GMT 2002

There is apparently a very thin cirrostratus overcast.

MKIV COMMENT: Sat Jun 8 17:12:14 GMT 2002

Scans look funny, probably due to the bright sky due to very thin cirrostratus.

Extended the dome slot.

MKIV COMMENT: Sat Jun 8 19:53:52 GMT 2002

I made a slight adjustment to the N-S axis of the Spar guider telescope to center the O1 guider better in that direction. It wasn't at a limit but would get closer to a limit as the day progressed, before my adjustment.

PSPT COMMENT: Sat Jun 8 20:17:52 GMT 2002

Paused to remove the MLSO CaK filter set, then use it as a model to tilt the ND on the NSO CaK filter set. Will then install NSO filter set and MLSO filter set will be sent somewhere for evaluation. Currently, before I change the filters, the MLSO CaK filter set has a tilted ND to prevent imaging of reflections on the CCD, the NSO CaK filter set has the ND filter parallel to the CaK filter element which can cause reflections to appear as images on the CCD.

PSPT COMMENT: Sat Jun 8 20:36:33 GMT 2002

Restarted observing. The NSO CaK filter set with the newly tilted ND is now installed.
