Sun climbed into overhead altostratus deck.

WEATHER COMMENT: Fri Jun 21 17:11:56 GMT 2002
Overhead altostratus deck is advancing and receding near sun. We will probably be in and out of clouds throughout. Wind is still howling downslope from southeast at around 35-45 mph.

GONG COMMENT: Fri Jun 21 17:34:54 GMT 2002
Going down to GONG to take care of a workstation problem.

COMMENT: Fri Jun 21 22:36:35 GMT 2002

Well, folks, this is about as long as I can extend the day for Cassini coverage. The medication has worn off and I don't want to take another before I finish driving down the mountain--don't want to fall asleep at the wheel.

I will begin shutting down shortly as soon as we finish up the GONG fiber optic patch cable tests for the day.
