PSPT COMMENT: Fri Aug 30 17:17:42 GMT 2002

Spar pointed just a smidge to north and east of sun center at start-up. So good pointing now with the new mount.

Will be replacing the big-bolts on the mount today. So things may shift around.

PSPT COMMENT: Fri Aug 30 17:26:22 GMT 2002

Darryl mentioned yesterday that the dome looked like it was lagging a bit behind the spar.

I think I has my compass orientation slightly off when I did the dome pointing on Tuesday. So just rotated the spar a bit further to the south, and did a "dome cal".

WEATHER COMMENT: Fri Aug 30 17:47:03 GMT 2002

In scattered cirrostratus patches.
