PSPT PROBLEM: Wed Sep 11 21:18:34 GMT 2002

Test didn't work, Sparcstation is unresponsive, will reboot and restart.

GONG PROBLEM: Wed Sep 11 21:29:36 GMT 2002

Going down to shelter to work on a problem.

GONG PROBLEM: Wed Sep 11 22:23:39 GMT 2002

Back from shelter, problems partially fixed. We can now use the xterminal to monitor the shelter conditions again, it's been down for months now. Chirag changed something back then, probably for security reasons, and he partly fixed it now. The ximtool window won't come up and the manual directions don't work, I kept getting "permission denied" messages when I tried to get the mkqrdisplay process installed. I modified the manual where needed and notified Chirag, he will try to fix the remaining problems. The other minor problem up here on the xterminal is that the gongTool GUI window gets hidden by an xterm window upon startup, currently we have to bring it forward using the

Front key on the keyboard, I mentioned that too so hopefully they'll change the startup.
