I reinstalled the DLT4 tape drive on Kaiee. I'm not sure what the ID switch should be set to, it is now on 4 - but the existing exabyte drive is also set to 4. I sent email to verify SCSI ID, will leave DLT4 drive off until this is verified.

Clouds keep getting thicker. Closing down, I need to get the GSA car serviced in Hilo.

I think I bumped the mouse and caused the scans to change to "anoroC". Will try "End Day" again.
