Year: 02 Doy: 352

Observer: stueben

WEATHER COMMENT: Wed Dec 18 17:46:16 GMT 2002

Clear sky, wind=5 mph from the South, temp=39 F.

MLSO PROBLEM: Wed Dec 18 17:47:00 GMT 2002

Darryl modified the Run program in \$Bin slightly from David's modification, had to delete the "(port B)" part of one line that was giving a "badly placed (" error message. That allowed the akamai window to come up and so far there aren't any error messages. Some instruments were started well before the start time of this log, there aren't log entries for them because of the akamai related startup problem preventing proper log startup.
