**\*\*GONG PROBLEM\*\***: Tue Jan 7 19:11:00 GMT 2003

Had to restart xterminal to get it connected with network this morning. There are error messages stating "the tape bank is disabled, can't unspool the images for writing", I emailed Gongops for advice on the best way to fix this.

**\*\*MKIV PROBLEM\*\***: Tue Jan 7 19:13:35 GMT 2003

No animation is being shown on Nahenahe, there are no GIF images in the data directory although there appears to be data files. Also Andrew wrote and notified me that data aren't being transferred from Nahenahe to Kaiee. My first fix attempt is to cycle the main power rocker switch that provides power for KCC and other equipment in that rack.

**\*\*MKIV PROBLEM\*\***: Tue Jan 7 19:21:07 GMT 2003

OK, now I'm seeing the Nahenahe animation and GIF images in the data directory

**\*\*MKIV PROBLEM\*\***: Tue Jan 7 19:35:25 GMT 2003

I checked Kaiee and the data files are going over OK now, problems fixed.

MKIV COMMENT: Tue Jan 7 19:50:16 GMT 2003

Centered the occulting.

\*\*PSPT PROBLEM\*\* : Tue Jan 7 21:27:27 GMT 2003

Stalled at 2103 "taking RED image", killed runPspt.pro and restarted.

GONG COMMENT: Tue Jan 7 21:33:24 GMT 2003

Going down to the shelter to fix the tape bank problem.

\*\*GONG PROBLEM\*\* : Tue Jan 7 22:52:41 GMT 2003

Back from shelter, all appears well there now, ended up doing a regular tape change because some kind of glitch yesterday prevented an EOD mark from getting on one of the tapes and I didn't want to risk overwriting that data. Also had to reboot the Data chassis to get it to talk to the DLT1 drive. I had to login to the workstation, so it was reset somehow too, that's why our xterminal wasn't connected to it this morning.

MKIV COMMENT: Tue Jan 7 23:43:28 GMT 2003

Centered occulting, also did this at about 2300 UT.
