EPL at PA 285, appearing at 2009 UT.
MLSO PROBLEM: Wed Jun 11 20:37:29 GMT 2003
POWER outage at 2012. Outage is system wide up here at MLO.
Moved plugs around to activate monitors and will attempt to shut down
what I can.
MLSO PROBLEM: Wed Jun 11 23:01:31 GMT 2003
Power was restored at 2213 UT. Reconfigured power distribution changes
I made to utilize monitors to halt workstations while UPS was running.
Working to reboot workstations and restart observations.
PICS and CHIP were started before logs reestablished. nahenahe had a
problem with restarting the logs so I had to close things down, logout,
and restart to re-establish logs.
CHIP PROBLEM: Wed Jun 11 23:06:02 GMT 2003
Looks like filter needs to re-establish its operating temperature yet.

MLSO PROBLEM: Wed Jun 11 23:53:27 GMT 2003
Hoike is not updating images beyond power outage.
MLSO PROBLEM: Thu Jun 12 00:12:57 GMT 2003
did a Luna stop then a Luna start on both kaiee and oopu. CHIP display on
hoike began picking up new images, PICS did not.
MLSO PROBLEM: Thu Jun 12 00:15:12 GMT 2003
The reason CHIP is updating and PICS and MK4 are not may have to do with
CHIP's shutdown during the power outage and the others not shutting down.
PICS and MK4 were halted then rebooted.
