COMMENT: Sat Aug 30 19:26:21 GMT 2003

Dec axis reset from about 19:02-20 while I was taking PSPT focus data for Andy.

MKIV COMMENT: Sat Aug 30 19:28:09 GMT 2003

Centered 01 guider.

PSPT COMMENT: Sat Aug 30 19:30:34 GMT 2003

Took manual images with varying focus position with the new Foukal filters for Andy. Had to manually adjust exposure - for blue used 18, for red used 7. File names are of the form yyyyymmdd.hhmm.HW.B.M , since only hour and minute are different I'll only note those digits and focus position for each image.

BLUE - 1832,300 1837,320 1840,340 1842,380 1844,460 1846,620 1850,260 1851,220
1853,180 1855,140 1857,100

RED - 1905,1950 1907,2050 1911,2150 1912,1850 1913,1750 1914,1650 1915,1550
1917,1450

I had some difficulty seeing differences in focus on the displayed images so after looking at the data you may want to have Darryl take some additional images tomorrow. Focus position seemed to limit around 2150 so there are no images with higher focus positions.
