 COMMENT: Fri Feb 6 23:32:58 GMT 2004
 Carrol spar disassembled into major components and removed from roof with the
 help of Tom and Nelson. Smaller components will need to be removed and
 packed in boxes and bubble wrap, then the spar will need to be crated up.
 COMMENT: Fri Feb 6 23:36:20 GMT 2004
 Closing down for the day. I need to get to town for District Science Fair.
 Tom and Nelson went on a hike toward the summit so I've left things
 completely shut down and locked. Anything left on will be turned on and
 forgotten by them. They will lock up and hide the key under a designated
 rock.
