Year: 04 Doy: 074

Observer: koon

WEATHER COMMENT: Sun Mar 14 17:14:13 GMT 2004

Thick cloud cover, wind=5 mph from the SE, temp=42 F.

COMMENT: Sun Mar 14 17:17:12 GMT 2004

No obs until clouds clear.

WEATHER COMMENT: Sun Mar 14 19:02:05 GMT 2004

It's getting foggy.

\*\*MLSO PROBLEM\*\* : Sun Mar 14 19:02:14 GMT 2004

The hood for the electrical cable roof snorkle was sitting on the small parts cabinet, it attaches to the snorkle on the new addition to keep rain out. I looked around outside and found the black plastic "knockout" piece, then I attached them both to the snorkle. It is fixed now.

ECHO COMMENT: Sun Mar 14 19:17:51 GMT 2004

Time OK.

GONG COMMENT: Sun Mar 14 21:19:16 GMT 2004

Talked to Ron on the phone. They installed the new better-sealed turret and are noticing it pulls higher amperage due to the new seals, so we may notice that the "Light Feed" field is yellow more often for a while - they will adjust the software alert limits as needed and the fields will be green again within the next few weeks. I'll go down to the shelter and Stow the instrument and cover the light feed, at Ron's request. There may be some rain coming.

WEATHER COMMENT: Sun Mar 14 22:32:13 GMT 2004

It is raining, with some sleet.

WEATHER COMMENT: Mon Mar 15 01:51:27 GMT 2004

It snowed earlier then melted, now it is snowing lightly again.
