MKIV COMMENT: Mon Mar 15 18:19:39 GMT 2004

Centered O1 guider.

****GONG PROBLEM****: Mon Mar 15 18:22:36 GMT 2004

Roll and Pitch amps were not turned off as part of the stow routine.

Apparently the morning unstow routine overrides the manual unstow condition so the turret woke up inside the protective bag and blew a fuse trying to punch its way out of the bag.

Used GONG expert function to disable pitch and roll while I replaced the fuse. Restarted turret and it began working normally again--with the bag removed.

Performed weekly PM to relieve GONGster PM crew from having to come up here today.

****ECHO PROBLEM****: Mon Mar 15 18:30:07 GMT 2004

Noticed there were no images on the echo display. Quit and restarting echosys. Images reappeared.
