PSPT COMMENT: Fri Apr 23 16:52:42 GMT 2004

Observing.

WEATHER COMMENT: Fri Apr 23 16:57:14 GMT 2004

Sky bright or polarized. Cannot see bright halo around sun, but there are indications of such condition in MK4 images.

****MKIV PROBLEM****: Fri Apr 23 17:05:19 GMT 2004

Checked tilt plates, they were in an undefined position, both tilt in and tilt out were enabled. Moved tilt plates out. Polarization effect on image increased rather than decreased or eliminated.

WEATHER COMMENT: Fri Apr 23 17:13:46 GMT 2004

Bright/highly polarized sky may be due to construction pollution next to GONG shelter. I can smell the diesel exhaust up here. Breeze has died down.
