PSPT PROBLEM : Mon Aug 30 22:45:41 GMT 2004
ran shutdown after closing dome to test parking positions. PSPT parked
correctly. Dome parked about 1 slot-width to west or where it normally
parks. That is probably the (old) offset from the old home position.
It looks about the same offset as the change in Home position.
Leaving it there to see if that affects startup next time.
