\*\*MLSO PROBLEM\*\*:  
Fri Feb 4 17:35:33 GMT 2005

Water on the floor this morning. Ceiling leaking lightly in the usual places, heavier toward the west from the beam between the two control rooms. No drips from the window between PSPT control room and dome. I'll mop up the water before leaving.

COMMENT: Fri Feb 4 18:47:15 GMT 2005

Finished telecon with Michael Knoelker.

Abandoning ship before road gets too slick to safely drive on it. It is still snowing and wind is still blowing.

Leaving ECHO in partial shutdown mode.

GONG turret still shrouded and shutdown.

Mopping up the water in the control room before leaving.
