****GONG PROBLEM****: Fri Apr 22 19:23:17 GMT 2005

I heard our main UPS growl briefly while restarting the GONG xterm.
By the time it came up, the gui indicated the system had hung up--suspect
is powerline glitches. The UPS growl may be indicative of such glitches.
Our UPS growled briefly again within 5 minutes of the "first" growl.
GONG went down between the time I restarted it while changing DLTs and
when I restarted the xterm (and the UPS growl).
Going back down to resstart system.

GONG PROBLEM : Sat Apr 23 01:52:05 GMT 2005

GONG crashed again. Leaving it that way until gongsters have a look to determine what is making the system so unstable. Resetting it appears fruitless at this point. They will get the message via the message log I've been keeping down there and via email I will send.
