WEATHER COMMENT: Wed Sep 14 19:33:07 GMT 2005

Cloud situation iffy -- moisture appears to be blowing by above station rather than at station. Opening dome and attempting observations while watching situation closely.

Most of high clouds to west of station.

GONG COMMENT: Wed Sep 14 20:44:48 GMT 2005

Went down to GONG to check out the gongsters' agenda. Crew will be here to troubleshoot and hopefully resolve the camera/data computer problem that has plagued their system for a while now. They brought out a spare camera and will replace the old one once they learn what is happening with the old one in place. Their plan is to return to Tucson on Monday, but that could be extended if the problems are not resolved.
