COMMENT: Fri Dec 23 17:55:02 GMT 2005

Received assortment of ND filters from Kim for tweeking the spar guider gain at the spar guider aperture. Need to try less dense filter to decrease light flux to just above level where the guider oscillates.

Not a good day to test--cirrostratus too thick.

PSPT PROBLEM: Fri Dec 23 17:59:16 GMT 2005

Ah buggers! Kenobi transfer tape popped out already. The last "good" drive may have failed, there is something wrong with kenobi's program, or tape is bad (although the tape was a brand new one!).

PSPT PROBLEM:
Fri Dec 23 19:03:18 GMT 2005

Alice got the tape to read into kenobi. Apparently some directory that contains the commands that kenobi uses to read in the tape disappeared with the reboot yesterday. Alice is using a substitute command.
