COMMENT: Fri Feb 3 21:17:31 GMT 2006

Hallelujah! PSPT is still running! I have been preoccupied with the  
learning curve and working out bugs with PICS data processing start-up  
that I haven't been paying much attention to the observations since  
systems were started up this morning.

\_\_\_\_end\_\_\_\_

COMMENT: Fri Feb 3 21:43:23 GMT 2006

Finally managed to work out connection into UCAR's secure firewall and telnet  
to odo. Managed to get there with kenobi, keiki, and temp.

Finally got Tony's mssrestore script to run after figuring out how to find

a valid, unprocessed file. The three places to look, (web, and two log files) are uncoordinated and we may have to check all three places to figure out which files to work on unless that issue is streamlined or worked out.
