Couldn't get gate to open from correct keypad, tried many times, eventually
got it to open by walking past the gate to the inside keypad and using that.

Tried 97d352, 97d353, and 97d354, mssrestore didn't work. It has never worked
for me yet. I get error messages that .fts files can't be found or opened,
and email error messages referring to cpar. I don't understand what the
problem is, I've given all the info to Tony. I always see the same error
messages when I try to run mssrestore, although others have run mssrestore
successfully on the same files that wouldn't work for me.
