COMMENT: Thu Apr 20 19:47:37 GMT 2006

Extended dome slot about 15 minures ago.

____end____

MLSO PROBLEM: Thu Apr 20 19:47:57 GMT 2006

The main dome has been slipping in azimuth for a while now, most noticeable in the morning when the dome points past the troublesome spot where a crude and misaligned patch piece was getting worn down. I used a Dremel to grind down the track in the right places at the patch area, the main problem was that the track holes were too small for the gear so the gear rode up high and slipped. It is working perfectly now. -Darryl

COMMENT: Fri Apr 21 01:25:06 GMT 2006
Possible developing problem - spar guider dec axis has not tracked well at times today. Tried adjusting gain when this happened but it didn't seem to make any difference.
