WEATHER COMMENT: Sun May 7 17:03:41 GMT 2006

Snowing, about 4 inches on the ground up here, so far I can drive on it but I may have to leave to avoid getting stuck up here.

GONG COMMENT: Sun May 7 17:05:44 GMT 2006

The instrument was covered with snow, cleaned it off, stowed turret, and covered turret.

WEATHER COMMENT: Sun May 7 18:33:59 GMT 2006

I can hear thunder.

WEATHER COMMENT: Sun May 7 22:02:48 GMT 2006

Still alternates between light rain and light snow, the clouds are getting darker and I can hear thunder. I'm going to head down to avoid getting trapped up here. Flash flood watch is in effect for this island too.

PICS COMMENT: Sun May 7 22:05:49 GMT 2006

I checked the diffusers earlier but need more information from Boulder before I can spec a new diffuser size and ship the diffuser material back to them, probably on Tuesday unless someone wants to do it before my next day up here. They want to use the 10 degree diffuser material for both the CHIP and PICS.
