PICS COMMENT: Tue May 9 18:49:59 GMT 2006

I removed the LSD diffuser and will send it to Kim with the other diffuser materials (CHIP diffuser, 10 and 5 degree diffuser material sheets) this afternoon via Fedex. The LSD position of the objective wheel is now empty, when Flat images are taken at that position we will get overexposed solar images instead - until the new diffuser goes into that position. Restarting the instruments.
