PSPT COMMENT: Fri May 19 17:24:31 GMT 2006
Installed ND filter sent by IG onto new narrow band CaK filter in position -200. I did not have the same washers available as the 5 on the 0.1 CaK filter in position 4600 but got the spacing under ND filter to approximately
-. 01 inch difference between the . 01 Cak filter and the new narrow band CaK
filter. Reinstalled the filter with the added tilted ND filter and started up.

Picked up exposure adjustment after calibration ended near 2100 UT. Exposure looks much better but still a bit dark. Alice agreed to let Mark examine the images and determine if and how much we should tweek the exposure.
