COMMENT: Fri Jun 9 16:46:37 GMT 2006

Slow start. Had to do a crude counterbalance job on the spar due to SBM mounted on front before spar would guide. Also took a bit of airbrushing to remove the crud on the Ols due to covers not closed overnight.

WEATHER COMMENT: Fri Jun 9 18:42:20 GMT 2006

Sky too highly polarized for decent MK4 images. Standing down for now.

___end___

WEATHER COMMENT: Fri Jun 9 19:02:21 GMT 2006

Sky brightness is relatively better, checking polarization's effect on mk4 image.

MKIV COMMENT: Sat Jun 10 01:23:59 GMT 2006

We are currently running th SBM and the mk4. There is very thin cirrostratus up there which is showing some sky brightness on the mk4 monitor, humps are about 2X normal amplitude, images show some polarization. Conditions are not ideal but we should be able to get some cross referencing of the two data sets.
