PSPT PROBLEM : Wed Nov 15 23:32:45 GMT 2006

Did a series of progressive shutdown conditions. Startup stalled at 3 exp step and typing in exp on PC did not cause program to resume as usual. Checked camera and shutter hardware, found that the camera chassis AC power was off. Checked the timer on the power plug and found the time set was way off. The timer had turned off the controller at around the time all the crashes have been occurring. Reset the time and made sure the timer had now switched power on. Restarted PSPT and startup program is running correctly.
