PSPT PROBLEM:
Fri Dec 8 00:45:26 GMT 2006

No images, noticed strange message about "serial buffer" on PC monitor, reset PC, killed runPSPT and restarted, dome ran away and motors sounded weird in PSPT as it does when it loses its mind this way, unplugged dome drive to prevent damage, killed runPSPT, rest PC, cycled power strip and shutter power, restarted from scratch like a new day after plugging dome drive back in, this time it worked, observing again.
