PICS COMMENT: Sun Dec 10 21:38:57 GMT 2006
I got some good data, now I'm going to try to work on the Halle filter
problem without stopping the other instruments, I may bump the spar around
until I'm done.
$\qquad$
$\qquad$
COMMENT: Mon Dec 11 01:18:54 GMT 2006
Bouncing spar around too much, pausing instruments.
$\qquad$
$\qquad$ **PICS PROBLEM**: Mon Dec 11 01:19:23 GMT 2006
Still working on problems.

**PICS PROBLEM**: Mon Dec 11 01:24:27 GMT 2006
$I^{\prime} m$ going to stop and cleanup for the day, I made good progress with the Halle filter problem. The underlying problem is that the filter weighs a lot and transfers its weight to a small bearing that is held in by friction and a tiny clip on the other end of the leadscrew that drives the filter in and out. I found and fixed a new problem related to the stage, the linear bearing at the 01 end of the stage had worked past the screw-type bearing stop and jammed the action of the stage; so I removed the bearing and cleaned and lubed it then replaced it and used washers to help orient the stops so they work again, the bearings and stops at the lower end were good but I lubed them too. I'm working on a way to hold the leadscrew bearing in better now, I will need to finish that on Tuesday so the PICS is down till then. The tiny setscrew for the leadscrew sprocket was stripped and I couldn't get it out so I drilled and tapped a new hole on the opposite side of the flange, then I installed a beefy capscrew that will be easier to tighten more and yet will be easier to remove too. The leadscrew was out of position and the cable-chain was off, familiar symptoms we've seen and temporarily fixed in the past, I hope to install a much longer lasting fix to that problem on Tuesday.

    Pausing obs, no disk images, apparently the problem started yesterday but
    wasn't fixed. It's probably the filter stage again. I'll wait until the
    dome warms up a little and some data are gathered by the instruments that are
    running, then I'll pause every instrument and lock the spar and work on the
    problem.
