GONG PROBLEM Tue Dec 12 17:45:15 GMT 2006

Didn't go down to shelter, the instrument started updating images a few minutes ago, I'm not sure why the last images displayed from yesterday were listed as 1921 UT.

PICS PROBLEM Tue Dec 12 22:10:15 GMT 2006

I've been working on the bearing keeper and am almost done with it. I could only get a 4-40 screw on the flange for the cable-chain gear, I did that last time, but I snapped off the capscrew flush with the flange today while tightening it. So that leadscrew gear is on there tight with no way to loosen it. It may not be a problem since the whole leadscrew and gear can be removed as a unit anyway, I cut a slot in the washer I'm using as a bearing keeper so it can fit in place without removing the gear, if we ever have to replace the circular bearing there then the gear will have to be pulled off and a new setscrew installed in it. The gear may come loose from wear, that would be a good time to install a new setscrew too.

Tue Dec 12 23:12:27 GMT 2006 CHIP End Patrol

PICS PROBLEM : Tue Dec 12 23:12:33 GMT 2006

I need to drill and tap hole on the PICS instrument so I'm pausing obs to lock the spar and work on that.

PICS PROBLEM : Wed Dec 13 00:41:06 GMT 2006

OK, I fixed the stage problems and restarted, but now the images are overexposed. Stopping everything to open PICS again and look inside.

Wed Dec 13 01:02:53 GMT 2006 PICS Start Patrol

PICS PROBLEM : Wed Dec 13 01:04:01 GMT 2006

OK, all problems are fixed now, the stage is working well and hopefully won't have that same old problem of popping out the leadscrew bearing anymore.

The image is still overexposed but I found the problem, I had forgotten to plug the Halle filter back in, it will take a while to get on-band again.

____end____

PSPT PROBLEM : Wed Dec 13 01:33:04 GMT 2006

Crashed, PC showed "serial port buffer overflow" error message. Killed

runPspt, exited IDL, turned off power like end of day, rebooted PC, then turned on everything and did a "Startup" like the beginning of the day.

This is how it has to be done to avoid a dome runaway.
