**** EVENT COMMENT ****: Thu Jun 14 00:30:15 GMT 2007

Possible CME overlying active region transiting the west limb. Subtle changes seen between the only good mk4 images taken between clouds at 1830, 1833, 1855, and 1918 UT. Changes could also have been a result of the poor sky conditions between the clouds. "CME" occurred at PA 230-250.

Thu Jun 14 01:37:02 GMT 2007
