PSPT PROBLEM : Tue Jul 17 21:17:37 GMT 2007

Crashed, restarted.

MKIV PROBLEM : Tue Jul 17 22:46:39 GMT 2007

I'm going to try to change a dual jumper set, P405 on the Signal Transformation

Board, I'm hoping this will invert the pixel clock signal and that will get the data back to normal.

Tue Jul 17 22:56:34 GMT 2007 MKIV Start Patrol

MKIV PROBLEM : Tue Jul 17 23:23:31 GMT 2007

That jumper change didn't change anything in the visible data. David suggests changing all 4 sets of double jumpers in that Camera Timing circuit so I'll stop and try that next, all 4 jumpers 404-407 will be opposite from what they were before today.

MKIV PROBLEM : Tue Jul 17 23:46:11 GMT 2007

That complete jumper change gave a lot of concentric rings. Next I'll try putting everything back to normal except for jumper P407.

____end____

MKIV PROBLEM : Tue Jul 17 23:52:02 GMT 2007

I have to repoint the spar in between each jumper change since guider power gets turned off with the transformation board power.

MKIV PROBLEM : Wed Jul 18 00:01:13 GMT 2007

Next only jumper P406 will be reversed from normal, in that camera timing set of 4 jumper pairs.

MKIV PROBLEM : Wed Jul 18 00:17:48 GMT 2007

I've already tried reversing only jumper P405 so this next time I'll try reversing just jumper P404.

MKIV PROBLEM:
Wed Jul 18 01:14:53 GMT 2007

The jumpers are back to the normal positions, the scan looks like it did this morning, still bad but not as bad as when I tried other jumper positions.

There are many possible combinations for these jumpers, I tried some, I'll draw up a diagram of the other possibilities for anyone else who wants to continue trying all the combos.
