MLSO PROBLEM: Fri Dec 14 18:50:04 GMT 2007 I heard the UPS beep and nahenahe, kii, nene, and hoike went down and began to reboot. While I was starting up hoike, the scenario repeated itself. I had to open a terminal window to type in "d4" and to start the animations. The screen timed out after around 10-15 minutes and so I contacted Bunny. She surmised that we started up in thw wrong environment. Normally the login starts one up in the last config but the power outage may have corrupted that. I exited the program and desktop and relogged in, this time, using the "Options" button to on the right side of the login window and selected "Sessions" the "OpenWindows Desktop". This started the familiar hoike desktop. end _____ Mauna Loa Solar Observatory Observer's Log _____ Fri Dec 14 21:52:05 GMT 2007 Year: 07 Doy: 348 Observer: vasukawa Fri Dec 14 21:53:45 GMT 2007 PICS Start Patrol **MLSO PROBLEM**: Fri Dec 14 21:54:04 GMT 2007 I checked the UPS status and ran a battery check because I started to wonder why the UPS allowed the Sparcs to power down. Battery test failed. Battery level was Low. Apparently they did not recover from the long power outage we had Thursday to Monday. Test knocked off the Sparcs so I had to log into them again and restart the observing programs. end Fri Dec 14 21:57:35 GMT 2007 CHIP Start Patrol WEATHER COMMENT: Fri Dec 14 22:06:41 GMT 2007 Cloud bank to east and in saddle is calving small clouds that may blow past the station.
