In orographic clouds, passing at low level. Closed domes.

Fri Sep 12 22:08:55 GMT 2008 MKIV End Patrol

PICS COMMENT: Fri Sep 12 22:10:30 GMT 2008

It's been 6 minutes since I hit the End button and Special is still running.

Killing Special to stop it.

\_\_\_\_end\_\_\_\_

PICS COMMENT: Fri Sep 12 22:12:15 GMT 2008

Wow, that killed everything except the console, xterm and clock on the display. "ps" indicates Special, Disc and Program are still running.

Canceling them and testing various procedures to stop Special.

\_\_\_\_end\_\_\_\_

PICS COMMENT: Fri Sep 12 22:18:19 GMT 2008

Stopped PICS by canceling all the processes individually. Restarted (Run), trying various things to get Special to stop (gracefully, I hope).

PICS COMMENT: Fri Sep 12 22:27:37 GMT 2008

Using Abort rather than End stops Special, gracefully moving the optics to their default shutdown stations.
