MKIV PROBLEM Sun Oct 26 19:30:33 GMT 2008

Kept getting "data transfer error" messages. Tried a variety of things, what finally worked was to Idle the Patrol then do a "Stop-A" then "boot" to reboot Nahenahe, I logged in, cycled KCC power, typed in "run", the log for today was still there and fine due to Alice's fix a while back. I'll redo the Cal, I'm not sure if it turned out OK, during the previous Cal is when the problems seem to have started.
