PSPT PROBLEM Fri Dec 19 17:44:16 GMT 2008

Start up mispointed. Manually pointed spar and running Center image.

____end____

Fri Dec 19 17:45:35 GMT 2008 PICS Start Special XLR

PICS COMMENT: Fri Dec 19 17:45:21 GMT 2008

Changed occulting disk from #2 (2001) to #1 (2012).

Running Special, hole in cirrostratus is approaching.

____end____

PSPT PROBLEM Fri Dec 19 17:58:33 GMT 2008

Still had problems centering image. It was due to a loose RA clutch and a lost filter wheel. Fixed both and started an obs routine. Once I was sure an image was captured and within the frame, I aborted and ran another Center Image routine.

PICS COMMENT: Fri Dec 19 18:26:02 GMT 2008

Thick, extensive cirrostratus deck arrived over station.

Special XLR series aborted. Sky was never totally clear throughout test.

Requested one-hour test will probably need to be run again.
