MKIV PROBLEM : Tue Feb 17 19:31:19 GMT 2009

I removed the heater and shield to gain at least 0.125" of movement all the way around the camera box. Much better light signal looks promising, but I need to have a clear sky to look for the elusive double humps, right now there is a light to medium cirrostratus overcast.

Tue Feb 17 23:06:19 GMT 2009	PICS	End Patrol

MKIV PROBLEM : Tue Feb 17 23:28:51 GMT 2009

I wasn't able to align the camera today due to cirrostratus overcast.
