**\*\*CHIP PROBLEM\*\***: Mon Jul 20 23:26:02 GMT 2009

Have been working on Kii today - no display. Power supply appeared bad so I swapped in a spare - still no display. Put power supply, memory and interface board in spare Sparc 20 (Derlin). Have display now but doesn't boot, error message "Timeout waiting for ARP/RARP packet. Lost Carrier (transceiver cable problem?) ..." . May not be reading hard drive, no spares.
