\*\*PSPT PROBLEM\*\* : Sat Jan 16 18:18:02 GMT 2010

Unusual crash today during startup. Pspt stalled with the error message "No processes" in the xterm window as if it had lost all the processes it should have been running. I couldn't get it to do anything until I rebooted the Sun workstation. After the reboot it seems to be OK and I have started observing.
