NOTE BY DARRYL: Tue Dec 28 22:23:50 GMT 2010

The HawTel side of the network upgrade is finished, Norman came up today and did a layer 2 Ethernet test at 25 Mbps to Oahu successfully. We need to connect a switch and possibly a router to their equipment and configure those and setup new IP addresses in our computers to use the network. HawTel can do most or all of that for us, that's what I favor, I'll check with other interested people.
