MKIV COMMENT BY DARRYL: Tue Mar 29 19:04:33 GMT 2011

I thought I could get a Calibration and a little data but the light clouds moved in and ruined the cal.

CHIP PROBLEM COMMENT BY DARRYL: Tue Mar 29 22:21:27 GMT 2011

I see the dark vertical line and semi-circles that Joan and Giuliana have noticed in the data. I can see it in the Camera window on the raw data the easiest, the line is vertical across the entire disk and the semi-circles are to the left (East), all are very diffused and faint.

I checked the outside of the instrument and can't find anything wrong,

I'll check the optics inside another day when I have the time and the conditions are right. I think it is probably internal reflections getting to the sensor. Those imperfections are still affecting CHIP data.
