**GENERAL PROBLEM COMMENT BY BEN**: Mon Jun  6 17:11:10 GMT 2011
Power outage this weekend seems to have effected everything.
Internet is out; so systems that rely on DNS (maybe just windows stuff) cannot find remote hosts.
Kenobi, oopu, pspt, halpha, and Comp were off this morning.  Everything but CoMP appears to have started up without a prob
lem.  CoMP cant get past bios screen (yet).
Pspt camera timer thought it was 9pm instead of 7am.
Pspt sun time is off by at least two hours.

**GENERAL PROBLEM COMMENT BY BEN**: Mon Jun  6 18:30:11 GMT 2011
paahanaLuna on oopu cant run becasue /work is empty.  (Should oopu mount something /working? or just build it locally?)
___end___
NOTE BY BEN: Mon Jun  6 18:36:56 GMT 2011
Looks like it oopu should automount /work but there were some disk errors; running fsck and rebooting seems to have fixed
it.
