PSPT PROBLEM COMMENT BY DARRYL Mon Jun 27 00:17:15 GMT 2011

I checked the starting capacitor mounted up in a small J-box next to where the shutter motor normally mounts and it looks OK, last time we had this problem with a burnt-out shutter motor that cap blew also, to be safe we'll try to get another cap. I'll order a replacement motor for the shutter drive tomorrow.
