COMP PROBLEM COMMENT BY DARRYL:
Sun Apr 15 17:55:49 GMT 2012

Got about 4 opal esp300 error messages during Focus and startup this morning, related to new code check added on Friday. But it looked like the opal moved in and out properly, maybe the routine needs some tweaking?

GENERAL PROBLEM COMMENT BY DARRYL:
Sun Apr 15 18:01:26 GMT 2012

Ulua wouldn't display animations, rebooted and ran "wBoss start", still no displayed animations. This may be due to the moving of ulua:/gallery to mlserver on Friday.

WEATHER COMMENT: Sun Apr 15 18:53:28 GMT 2012

There's a very thin cirrostratus overcast now, pausing coronal instruments.

GENERAL PROBLEM COMMENT BY DARRYL:
Sun Apr 15 19:23:55 GMT 2012

Ben fixed the animations, some permissions were wrong, looks good again.

COMP COMMENT BY DARRYL: Sun Apr 15 19:27:30 GMT 2012

Ran the Cookbook again at Ben's request to see if the esp300 error message pops up again, it got past the opal moving parts of the early Cookbook recipes and also did a Focus w/o any esp300 errors, not sure why it is OK now. If it gave errors I would have tried cycling power to esp300 and restarting the COMP program (arrow at upper left of GUI).
