\*\*MKIV PROBLEM COMMENT BY BEN\*\*: Mon Jun 18 16:35:21 GMT 2012

To cold to start up akamai. Fan makes a clunking noise; and powersupply in vme crate fluctuates.

CoMP COMMENT BY BEN: Mon Jun 18 22:22:31 GMT 2012

Turned off System Restore for E:\

\_\_\_\_end\_\_\_\_

CoMP COMMENT BY BEN: Mon Jun 18 22:44:32 GMT 2012

Turned off 8.3 file names in NTFS, and lastaccess timestamp tracking

\_\_\_\_end\_\_\_\_

CoMP COMMENT BY BEN: Tue Jun 19 01:05:12 GMT 2012

Fixed System event log on CoMP it had no updates since March 16. Looks like log file was corrupted. Shut off logging, re booted removed System.Evt, turn on logging rebooted it is back now.
