GENERAL PROBLEM COMMENT BY BEN: Mon Jul 9 17:26:25 GMT 2012

We had a failure on the power protection circuit this morning, that required a manual reset to restore power to the MLSO building. Unfortunately the CoMP, and Main UPS batteries were drained before restoration of power. At this time it looks like all

systems other than mlsoserver and oopu are back online. I am not sure why oopu is hanging. mlsoserver is running fsck on the big disk should be back online by about noon.

While /data is offline I am observing with pspt and comp
