NOTE BY ALLEN: Wed Aug 1 23:37:40 GMT 2012

Hilo Crane called today to setup a time to have a crane operator come up to

look mlso and determine if their crane could be used to replace our dome (Ben had already talked to them once). They had someone available today and as they same owners as Yamada Paving he thought that they could get by the road paving. The crane operator arrived about noon and we talked about the project and took measurements. He saw no big problems in getting access to our building or removing/installing the dome and possibly other equipment as long as the wind was light. One question he had that I couldn't answer was whether we would supply the rigging to lift the domes or if they would need to supply it.
