CHIP COMMENT BY GREG: Mon Feb 11 19:49:08 GMT 2013

Chip has overheated, Tek temp cooler is very hot but the temperature input is very low. I am troubleshooting to see what is wrong with it.

MKIV PROBLEM COMMENT BY BEN: Mon Feb 11 21:12:43 GMT 2013

Mk4 analog signal looks funny this morning. The pattern of humps occurs twice with the second read out shifted about 1/2 a waveform to the right.

I think this suggests the o-scope is seeing the sync signal at the wrong time. I also noticed that the X1 led on the transform board burned off

intermittently during this period. This LED indicates a HSYNCERR (when off) and in the past I have never seen it off.

Now the O-scope looks good and some coronal signal can be seen through thick haze. I am not sure what changed to get the coronal and sync signals

back to nonomial performance.

CHIP COMMENT BY GREG: Mon Feb 11 22:50:29 GMT 2013

The problem with the Tek Temp Cooler is the RTD malfunctioned low which turned on the heater until it overheated. The temp controler resolves proper temp when RTD is simulated with a resistor. Also the chiller function is not operating properly.

I belive the chilling function was not working before today.

Tue Feb 12 00:16:32 GMT 2013 MKIV Start Patrol

MKIV COMMENT BY BEN: Tue Feb 12 00:17:54 GMT 2013

Happened a second time in the CCW direction slowing to a halt at 239

____end____

MKIV COMMENT BY BEN: Tue Feb 12 00:26:38 GMT 2013

Problem actually occurs in both directions, barrel will rotate less then 360 degrees and stop. The observation will finish, akamai console will display a t_bdrive barrel glitch. Then when it is time to start the next observation we here a BEEP from nahenahe and the barrel continues to 180 in the directing it was going during the previous scan.

After this is begins its new scan in the proper direction where it again stops early

____end____

MKIV COMMENT BY BEN: Tue Feb 12 00:32:18 GMT 2013

Rebooted akamai to see if this fixes the barrel issues

____end____

Tue Feb 12 00:32:47 GMT 2013 MKIV Start Patrol

Tue Feb 12 00:39:03 GMT 2013 MKIV End Patrol

MKIV COMMENT BY BEN: Tue Feb 12 00:40:32 GMT 2013

Still see the problem in some sans

____end____

CHIP COMMENT BY GREG: Tue Feb 12 01:06:46 GMT 2013

Tek Temp Cooler was left on so it will pump but the RTD input was left open so it will not temperature control

____end____

Tue Feb 12 01:43:59 GMT 2013 COMP End Patrol

Tue Feb 12 01:46:25 GMT 2013: PSPT Abort Patrol

CHIP COMMENT BY BEN: Tue Feb 12 01:48:58 GMT 2013

Colant final temp 103F
