Temp 46F, clear skies in the East, wind gusting between 25-30mph from the Southeast. Waiting for the wind to calm before opening domes.

PSPT COMMENT BY LISA: Mon Jun 3 18:31:12 GMT 2013

Took a look at Pspt this morning. Rebooted both the Sun and the Dos machines. Stabilized the cables of J61 and J62(?) at the neck with green hose. Seems to be doing better.

NOTE BY BEN: Mon Jun 3 21:28:14 GMT 2013

Pspt image looks funky. Like we might have an issue with the filter. SW is grainy where we can see the granulation. But the NE is blurry possible out of focus.
