Hi All, Last day on the mountain. I mounted shabar on the chromag face of the spar. It will eventually need to be moved, but it looked to be the best place for now. The shabar power supplies are on the comp table in the dome. We really need to keep observing with shabar to get to the bottom of our dome seeing issue. Packed the pelican crate with the valuable items to be returned to hao. It came to 72 lbs. Ben or Allen, could you guys please ship it to me? Many thanks. Best, Steve
